

Integrated Multipurpose Animal Recording Systems in India - INAPH

Kamlesh Trivedi

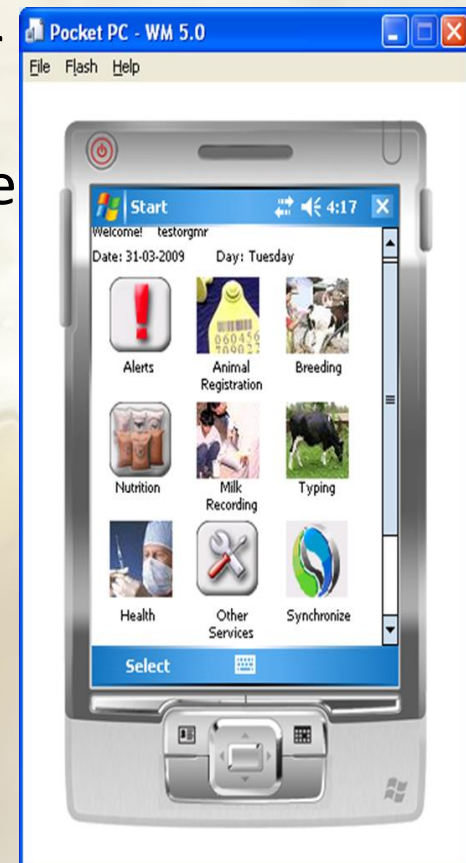

Progress of INAPH

- Information Network for Animal Productivity and Health (INAPH) was developed and pilot-tested during 2006-08.
- Deployed in field in April 2008 in one district for monitoring a progeny testing programme
- At present , INAPH application is used across the country for many purposes (As on : 26-09-2021)

1	No. of states	36
2	No. of districts	709
3	No. of villages	515,013
4	No. animals registered	180,103,350
5	No. of projects	303
6	No. of users	398,747
7	No. of AI entered	49,233,272
8	No. of calving recorded	6,713,671
9	No. of test-day records	4,739,215

- [Index - INAPH \(nddb.coop\)](http://nddb.coop)

Contents

- Objectives
- Overview of the INAPH Application:
 - Hardware –Tools, Technology, and Platforms
 - Software:
 - Different modules
 - Reports - Operational Reports, Review Report , MIS Reports, Analytical reports, etc.
 - Implementation Support
- How the application is used for Animal Identification and Registration, Breeding, Nutrition, and Healthcare services
- INAPH Progress

Objectives

Provide IT infrastructure to agencies extending productivity enhancement services

Identify animals uniquely

Record all events in productivity enhancement area

Monitor field activity

Activity	No.
A. Registration & ID	
1. Registration	7
2. Registration (Born)	1
3. Farmer Registration	6
4. Movement(Sale)	1
5. Movement (Death)	1
6. EarTag Change	2

Make available relevant information online

Provide decision support system.

Create National Level Database

Data Analytics

INAPH – An Integrated Multi-purpose System

Animal Identification and Registration

Mehsana Buffalo being ear tagged

Identification and Registration of Animals

- Animals are identified by 12 digit unique ear tag numbers:
 - First 11 digits of Ear tag number are running serial numbers.
 - 12th digit is check digit
- Ear tags' number are provided by NDDDB ensuring uniqueness of number across country.

Unique Bull / Semen Identification

Reports

AI service at farmer's door step

Every inseminated animal is to be identified by an ear-tag having unique number

Semen from A or B grade semen station and of certified bull only used

Record all data of AI, PD and calving on an individual animal basis through INAPH

Breeding Module

Artificial Insemination (AI)

Pregnancy Diagnosis (PD)

Calving

Breeding Module - Insemination Types

Test Insemination

- Test Bull ID
- Test Village
- Test Period (From ,To)

Nominated AI

- Nominated Bull
- Nominated AI

General AI

- Neither Nominated nor Test

Breeding Module - Inbreeding Validation Mechanism

Mechanism inbuilt in the AI functionality.

System keeps track of Sire, Sires's Sire & Dam's Sire for each animal.

To check inbreeding, these sires are popped up at the time of AI.

Mechanism can be best used when transactions are recorded at cow site.
