

## MAPPING OF THE HORTICULTURE PROJECTS CURRENTLY ACTIVE IN UGANDA

Between the year 2020-2022, Uganda has had an increase in the number of projects focussed on development of the commercial horticulture value chain in Uganda. In order to increase awareness of these projects and encourage collaboration, Uganda Agribusiness Alliance (UAA) has created a **MATRIX** providing a “map” of the value chain addressed by each project, specifying which parts of the horticulture value chain are being addressed by each of the different Projects, in what way, and for how long; as well as **GEOGRAPHIC MAPS** showing which areas of Uganda are being served by the several horticulture developments projects active in Uganda, as well as. This report therefore provides the results of the horticulture projects’ mapping conducted by Uganda Agribusiness Alliance (UAA) in May and June 2022 as part of services provided under the STDF543 Project of the Ministry of Agriculture, Animal Industry and Fisheries.
